Mastering HTML5, CSS & JavaScript for Mobile Application Development (Android Edition)
The Mobile Application Development, Design & Security Training Series

Duration: 5 days  
Focus: Mobile application development series for Android  
Targeted Audience: Experienced HTML Developers  
Skill-level: Intermediate  

Hands-On Format: This hands-on class is approximately 50/50 hands-on lab to lecture ratio, combining engaging lecture, demos, group activities and discussions with comprehensive machine-based practical programming labs and project work.  

Delivery Format: We’re flexible! This course is available for onsite private classroom presentation, or live online virtual presentation, or can be presented in a combined delivery learning solution. Please also visit our Public Schedule for open-enrollment course dates.  
Customizable: This course may be easily tailored to target your training skills objectives, tools of choice and learning goals.  

Mobile devices and the Android OS have completely altered the way we experience the Internet, browse web pages and consume online content. More and more people are using their mobile device, be it an Android or an iPhone, to find data relevant to them wherever they are. More and more web sites now need to adjust themselves to the new world, and adapt their content so that it will work well on the small screen.

Mastering HTML5, CSS & JavaScript for Mobile Application Development (Android Edition) is a hands-on HTML5 mobile / Android development training course that explores building the mobile web and mobile web applications with a focus on support for the latest Android devices. Students will learn the essentials of how a mobile device is different from a desktop, the different mobile browser types, the techniques to develop a mobile aware web site, and how to deliver our content through the web and through the various app stores.

Course Objectives: What You’ll Learn

This course provides indoctrination in the practical use of the umbrella of technologies that are on the leading edge of mobile application development. All labs are developed for Android.

Working within a dynamic, hands-on learning environment, guided by our expert mobile application development team, attendees will explore:

- Mobile Frameworks Overview: Android Development Studio, Eclipse, Sencha touch, jQuery mobile, jQTouch
- The Single HTML Paradigm
- JavaScript for Mobile Developers
- Object Oriented JavaScript
- CSS For Mobile Devices
- UI Design with jQuery Mobile
- Using HTML5 Mobile APIs
- AJAX and Client/Server Applications (Optional)
- Android platform development

Need different skills or topics? If your team requires different topics or tools, additional skills or custom approach, this course may be easily adjusted to accommodate. We offer additional mobile and web programming, design and security courses which may be blended with this course for a track that best suits your development objectives.

Course Structure: Throughout the course students will be led through a series of progressively advanced topics, where each topic consists of lecture, group discussion, comprehensive hands-on lab exercises, lab review and quizzes. This course is “skills-centric”, designed to train attendees in leading-edge web development skills, coupling the most current, effective techniques with the soundest practices.

Hands-on Learning: This course is about 50% hands-on lab and 50% lecture, with extensive programming exercises designed to reinforce fundamental skills and concepts learned in the lessons. Our courses include ample materials and labs to ensure all students are either appropriately challenged, or assisted, at all times – no matter their skill level.

Audience & Pre-requisites: Who Should Attend

This is a hands-on programming class. Attendees should have previous experience or working knowledge of developing software applications, as well as basic HTML. Real world programming experience is a must.

Take Before: Students should have working knowledge of basic HTML and CSS, and should attended this course as a prerequisite

- TT4105 Web Essentials: HTML and CSS

Alternative Courses: We offer other courses that provide different levels of knowledge or focus:

- TTG4635-A HTML5 Mobile Application Development (with Android Overview & Demo) – 4 days
- See our Mobile Application Development course tracks for many other Android development course choices.
Take After: Some of the more popular follow-on courses include:

- TTC675 Secure Mobile Application Development | Mobile Application Security
- Other courses from our Web Development, Programming & Design Track

Please contact us for recommended next steps tailored to your longer term education, project or development objectives.

### Student Materials: What You'll Receive

Our robust course materials include much more than a simple slideshow presentation handout. Student materials include a comprehensive hard-copy course manual, complete with detailed course notes, detailed lab manuals and workbooks, code samples, software tutorials, diagrams and current reference materials, all directly related to the course at hand, indexed for ease of use. Step-by-step lab instructions, software tutorials and project descriptions are clearly illustrated and commented for maximum learning.

### Workshop Topics Covered

#### Module 1: Hello Mobile
- Mobile vs. Web
- The Tools
- Debugging Techniques
- Mobile Frameworks Overview: Android Development Studio, Eclipse, Sencha touch, jQuery mobile, qTouch

#### Module 2: The Single HTML Paradigm
- Moving to a Single Index.html
- Handling js/css Files
- Writing an Automated Build Script

#### Module 3: JavaScript for Mobile Developers
- Object Oriented JavaScript
- Code Architecture for an App
- Handling Namespaces
- Avoiding Global Variables
- Using Objects Efficiently
- Memory Management

#### Module 4: CSS For Mobile Devices
- Working with Different Screen Sizes
- CSS Media Types
- CSS3 Advanced Features

#### Module 5: UI Design with jQuery Mobile
- Page Architecture
- Writing List Views
- Creating Icon Grids
- Adding Buttons
- Adding Toolbars and Tab Bars
- Wiring Up Actions

#### Module 6: Using HTML5 Mobile APIs
- Location API
- Client Side Storage
- Canvas
- Audio and Videos
- Introducing Phonegap
- Packaging for Android

#### Module 7: AJAX and Client/Server Applications (Optional)
- Data transfer using JSON
- Parsing and building DOM elements from JSON data
- The single page pattern
- The same origin policy and JSONP
- Using web sockets API for ‘push’ notifications

### Delivery Environment: Tools to Use

This course can be delivered using a variety of software combinations and tooling. Our detailed lab workbooks are complete with software-specific instructions and tutorials, screen shots and step-by-step illustrations for using the software you select. In most cases we can port our classes to run in the environment of your choosing. Please inquire for details.

### Setup Made Simple!

Our mission is to ensure a smooth start to your course with minimum set up burden for your team or firm. We offer several course set up options to help meet that goal. Please inquire for details on requirements and costs.

- **Manual Course Setup.** Our team provides a detailed setup guide with specific instructions, packaged software and links for all course tools and labs, as well as much live assistance as required to prepare your attendees or classroom for the course.
- **LoadNGo Instant Classroom Kit (DVD Image).** Depending on the course, we can supply a custom, course-specific DVD that houses the course set up software, labs, and other pertinent useful student resources such as whitepapers, tutorials and additional examples. This image is simple to install and remove, without impacting your student environments.

#### Remote Lab Environment.
Your team can access our hosted environment to access and use the software, labs and tools required for the hands-on portion of the training.

#### Provide Pre-Loaded Equipment.
If needed, we can ship in pre-loaded equipment to your site.

### Focused, Skills-Driven Training | Maximizing Your Training Time and Value, while Reducing Risk

Our training programs are designed to be skills-driven, focused events, targeted to deliver the true skills you need to succeed in your projects and role. We’ll work with you to ensure that your valuable training time and dollar is truly maximized. If your team requires more or less advanced materials or additional or custom topics, this course may be easily adjusted to accommodate. We offer and can blend on a wide variety of surrounding and supporting tools and elements to build out a truly robust educational experience, for you, your team, or your entire organization.

Trivera Technologies
Collaborative IT Training, Mentoring & Courseware Solutions
www.triveratech.com | info@triveratech.com

Please contact us for details about our Extended Education Programs that support, surround, supplement or extend your learning initiatives such as:

- Collaborative mentoring for your team
- Pre-and post-training assessments help place learners on the right path
- Mentored, comprehensive case-studies can be woven into your training programs, complete with guided work and instructor interaction
- Guided or self-paced projects, homework and exams
- Interactive, self-paced programs students

- Virtual lab hours and/or constant Mentor access
- Role-based, Topic-based or Goal-based corporate Training Roadmap and Learning Paths development, rollout and support
- Skills-focused custom New Hire Training Programs and team Reskilling initiatives
- Learning Management or Vendor Management Services for your organization
- Plus many additional, flexible learning modules, initiatives and programs that can be delivered across a variety of subjects and modalities, completely tailored for your organization

**Why Choose Trivera Technologies?**

Whether you’re a manager choosing a training provider or course to bring to your team, an instructor looking for reliable, solid course materials, or a student looking for an exciting, targeted training class to attend or to recommend to your colleagues - **Our single focus is to make YOUR training event or experience a success.** Here’s why choosing our team as your web development, programming and design training and courseware resource takes the risk right out of your decision making process...

- **Our prices and services are guaranteed.** We stand behind our courses, courseware and instructors 100%. We'll match or beat any pricing for similar services, any time. Whether you’re a stakeholder organizing your firm’s educational services, a student in our live or virtual classroom or a trainer using our materials to educate your own client or team.

- **Our Instructors and Mentors bring years of leading-edge, hands-on Web Development, Design & Programming experience into the classroom and content.** Our engaging, dynamic instructors and course authors are also skilled web developers and designers, who work on exciting web projects in between training engagements. Many of our web team members are game designers and developers, mobile app developers, and mobile app and web development security experts - all of whom are immersed in the latest skills, tools and technologies available in this fast-changing industry. They bring experience and expertise well-beyond the course materials.

- **Our ‘skills-driven’ courses are efficient, focused, current and comprehensive.** Our experts target exactly the skills your team needs to succeed in their jobs, projects or roles, rather than taking a ‘laundry-list’ approach to training, which can often result in overtraining, course overload or overwhelmed students. We'll work with you to define what it is you need to accomplish, and create the right program, training to those goals. Students of all skill levels will be able to hit the ground running with their new skills right after class ends, since the program was correctly designed from the start.

- **Our 360° Turn-Key Training Services ensure your Important Event is Truly Targeted, Exceeds Your Expectations and is delivered 100% Worry-Free!** The Trivera team treats every delivery engagement like a first-run, important event, not simply a staffing assignment. For every class we deliver, our team works closely with yours to ensure that your course runs smoothly from start to finish, and that there are no surprises in the classroom for you, your students or the instructors. Our experts work with you to choose the right topics and courses that align with your true skills goals, tuning as needed. We align the best all-around trainer to fit your exact needs – not just whoever happens to be ‘on the bench’. We offer pre-reading, quizzes and support resources to help assess and prepare your team for the training, so we can best tune the training and maximize their time in the classroom. We'll ensure that your classroom is set up and ready to go prior to course start. Throughout the course delivery, our instructors constantly evaluate the class delivery and students, tuning topics, activities, discussions and labs as needed to ensure all student skill levels and needs are targeted. All activities, data and results are documented and shared with your firm so you have a complete picture of the course and its results, throughout the course delivery, and afterwards. Post training support is also included for your students to address any future related questions.

- **We wholly-own our course content, giving Trivera flexibility & quality above the rest.** Our course materials are owned by our company and fully customizable at little or no cost. Dozens of training firms and independent instructors purchase and use our course materials, and hire us for training support as well. As a result, our courseware is subject to very stringent quality requirements. Not only will your organization benefit from our own technical team’s technical expertise, but also from the feedback of hundreds of students and trainers using these materials, worldwide, on a regular basis. This unique fact guarantees that our materials are not only robust and interesting, but also technically correct, current and of the highest quality and usability.

- **Our content is always updated and ready to go.** Our dedicated course development team keeps our training content, courses and student resources completely updated with the latest skills, industry trends and software editions to ensure your team is always getting the most current information, techniques and skills available.

- **We’re here for Extended Support Service** for students, instructors, facilities or anyone using our content or working with our instructors, in any way. There is someone here to assist you with questions, technical calls, set up, content – or whatever you need - at all times. Your success is our singular goal. We also support all of our students long after the class ends by offering pertinent free technical resources, live...
mentoring and technical support to help you apply your newly learned skills, and steeply discounted additional training offerings.

- **We're published authors and industry speakers.** Our team was selected to write the online JEE, EJB, CMP-CMR and Web Services Tutorial Series for IBM developerWorks®. These are the same instructors who train our classes and author the courseware. Most of our trainers/consultants have also authored additional articles on web services, EJB, Struts, JEE and advanced Java topics, and are recognized speakers and presenters on the industry technical seminar circuit. Our team is comprised on several successful published authors. Members of our team have written or contributed to: Python Programming, Eclipse Kick Start, Mastering Eclipse; Professional Struts; Using Java Tools for Extreme Programming; Mastering Resin; Mastering TomCat and others.

- **Need a small-business status with whom to team?** Trivera Technologies is a 100% Woman-Owned Small Business Concern. Please contact us to team with us for your small-business or woman-owned set aside opportunities.

- **Our prices and services are guaranteed.** We stand behind our courses and instructors 100%. We’ll match or beat any pricing for similar services, any time. Whether you’re a stakeholder organizing your firm’s educational services, a student in our live or virtual classroom or a trainer using our materials to educate your own client or team — **Our core mission is to make YOU a success in the classroom.**
