

TT6240: Mastering Struts 1.x Developer's Workshop (5 days)

Created in collaboration with several leading J2EE and Struts authors and industry experts, Trivera Technologies **Mastering Struts Developer's Workshop** is a lab-intensive, hands-on programming course that will provide students with the skills required to design and build scalable, secure, maintainable web applications - leveraging our team's extensive experience in the delivery of scalable enterprise applications with complex web interfaces based on J2EE technologies. This course extends that discussion to cover a preview of Struts 2.0 and how it relates to current Struts applications.

► Course Overview

Struts is the second generation of the open source, Model-View-Controller (MVC) framework developed by The Apache Software Foundation as part of its Jakarta project. Struts 2.0 is built on top of a variety of components and technologies to provide tremendous flexibility and address many lifecycle issues. After reading the first J2EE Blueprints from Sun with their explanation of MVC and how to accomplish it with custom tags, Servlets, and JSP, one can clearly see that Struts 2.0 is a manifestation of Sun's J2EE MVC vision that uses many of the more recent innovations in both Java and J2EE.

Struts addresses many major issues in using vanilla Servlets/JSP to build web systems. It solves the problem of controller complexity by removing the workflow logic from the Servlets, and directing workflow in an XML configuration file. Struts improves on the limited form support in JSP by adding numerous capabilities to form processing including easy validation, easy error display, and the refilling of form input on form retries from a users previous entries. It minimizes the complexity of JSP pages, by supplying a very extensive and flexible set of custom tag libraries for many of the standard operations needed in JSP pages.

Struts has become a large and complex set of technologies and tools. As such, this course is highly customizable to allow you to select a course that best fits your needs. For example, there are selectable, optional modules on how to extend the Struts framework to fit your unique needs; how to develop and use custom tags within the framework; how to work with JSP 2.0, EL, and JSTL; and how use the Tiles constructs within Struts. As an additional bonus, the course includes a preview of Struts 2.0 and how it relates to existing Struts applications.

► Course Objectives: What You'll Learn

Students who attend the **Mastering Struts Developers Workshop** will leave the course armed with the required skills to design, implement, deploy, and troubleshoot Struts web applications. This course provides coverage of all the standard components, filters, renderers, converters, and validators, along with advice on how to use them to create solid applications. Working in a hands-on environment students will explore and use complex user interface layouts, prototyping, and integrating templates with back-end

COURSE SNAPSHOT

Duration: 5 days
Skill Level: Intermediate
Focus: Struts 1.2 application development
Audience: Experienced J2EE developers
Format: Extensive hands-on programming labs, expert lecture combined with open discussions and high-level demonstrations and dynamic group exercises.
Language / Tools: Java-focused, available for most IDEs and application servers.
Delivery Format: Available for onsite private classroom presentation, or live online / virtual presentation
Customizable: Yes

model objects. Working in a dynamic, interactive discussion and hands-on programming environment, developers will:

- Understand the problems with vanilla servlets/JSP, and the motivation for Struts
- Understand MVC and the Struts architecture Understand the Struts controller, Struts views, and Struts resource bundles
- Create & configure applications using Struts
- Define views, actions, and FormBeans
- Use Struts for form processing
- Use ActionMappings
- Handle errors and debug Struts applications
- Utilize Struts validation framework
- Use the Bean, Logic, and HTML Custom Tag Libraries
- Use the flow-of-control custom tags
- NEW! Preview of changes in Struts 2.0 and how they relate to current Struts applications for each topic and lesson

Optional Sessions

- Advanced Form Management using DynaAction and Validator frameworks
- How to extend Struts
- How to use Tiles and advanced Tiles constructs
- Working with JSP 2.0, EL, and JSTL

The course provides a solid foundation in basic terminology and concepts, extended and built upon throughout the engagement. Processes and best practices are discussed and illustrated through both discussions and group activities.

Attending students will be led through a series of advanced topics comprised of integrated lectures, extensive hands-on lab exercises, group discussions and comprehensive demonstrations. Please see below for additional information about the hands-on lab work.

► Audience & Pre-requisites: Who Should Attend

This is an **intermediate level** Struts training course, designed for experienced J2EE developers that need to further extend their skills in web development and Struts.

Attendees should have an extensive working knowledge in developing J2EE applications.

► Related Courses – Suggested Learning Path

Take Before: Students should have basic development skills and a working knowledge in the following topics, or attend these courses as a pre-requisite:

- **TT2101 Core Java Programming Fundamentals**
- **TT5100 Mastering J2EE Web Applications (Servlets, JSPs, JDBC, Security, etc.)**

Take Instead: We offer other courses that provide different levels of knowledge or focus:

- If you need quick into to basic Struts coverage please consider our three day subset course: **TT6200 Fast Track to Struts**
- If you need both basic J2EE and Struts training, consider: **TT6260 Developing J2EE Web Applications using Servlets/JSPs, Tags, and Struts 1.x**
- Please note that all courses are also offered using the Struts 2.0 framework.

Take After: We offer a variety of introductory through advanced security, development, project management, engineering, architecture and design courses. Students may want to consider the following topics as a follow-on to this course.

- Additional advanced Java EE topics
- Java or J2EE Security topics
- Service-Oriented Analysis and Design
- Web Services – Intro through Advanced
- AJAX, XML or other Web Development topics
- Java EE topics: EJB3.0; Spring; Hibernate; Design Patterns & more.
- Architecture & Analysis courses

Please note all development courses may also be offered in other programming languages or tailored to suit your unique requirements. Please contact us for recommended next steps tailored to your longer term education, project or development objectives.

► Experiential Learning: Hands-On Labs

This class is “technology-centric”, designed to train attendees in essential Struts development skills, coupling the most current, effective techniques with the soundest industry practices.

This workshop is about **50% dynamic lab exercises** and **50% lecture**. Throughout the course students will be led through a series of progressively advanced topics, where each topic consists of lecture, group discussion, comprehensive hands-on lab exercises, and lab review. Multiple detailed lab exercises are laced throughout the course, designed to reinforce fundamental skills and concepts learned in the lessons. At the end of each lesson, developers will be tested with a set of review questions to ensure that he/she has fully understands that topic.

► Student Materials: What You’ll Receive

Our robust course materials include much more than a simple slideshow presentation handout. Trivera Technologies Student materials include a comprehensive hard-copy course manual, complete with detailed course notes, code samples, diagrams and current reference materials, all directly related to the course at hand, indexed for ease of use. Step-by-step lab instructions and project descriptions are clearly illustrated and commented for maximum learning and ease of use.

Our course kits are designed to serve as an excellent and useful reference set, long after we leave your classroom.

► Delivery Environment & LoadNGo™ Classroom Set Up

Although this training is skills-centric, this course may run using a variety of IDEs and application server combinations, including but not limited to: JBoss 4.x; BEA WebLogic Server 8.1/9; IBM Rational Application Developer (6.0 or 7.0); Oracle JDeveloper 10g; JBuilder; Apache TomCat; Eclipse Web Tools Project, MyEclipse; and others.

Our lab guides are complete with software-specific instructions, screen shots and detailed tutorials for using the software you select. In most cases we can easily port our classes to run in the environment of your choosing.

For course deliveries or virtual presentation using open-source tools, we’ll provide our unique **LoadNGo Instant Classroom Kit**, which enables students to run the entire course off of a DVD that hosts the entire course set up software, labs, and other pertinent useful educational resources, whitepapers and more. You only need to provide the hardware and appropriate O/S, and we’ll do the rest. No installation needed. **Great for secure environments.** Minimum set up burden for your team or firm, with maximum results for your students.

No matter which set up option or software your firm requires, we’re pleased to provide a detailed set up guide for all private or on-site courses, and as much assistance as you require to prepare your students or classroom for the course. Our support personnel

and instructors can be contacted for any advice you may require to prepare your classroom and/or students for attendance.

► **Optional Pre-Testing & Assessment**

We work with you to ensure that your resources are well spent. Through our basic pre-testing, we ensure your team is up to the challenges that this course offers. We will work with you to come up with the best solution to ensure your needs are met, whether

we customize the material, or devise a different educational path to prepare for this course.

Please contact us for details about our online pre and post test assessment services, custom managed training plans for one student or your entire organization, and our custom online training program management system for monitoring the courses or progress while skilling your students of all experience levels.

Workshop Topics Covered

Need more info? Please note that a more detailed outline of the course table of contents, lists of lab exercises and project descriptions is available. Please contact us at Training@triveratech.com for info.

Need courseware? This course is fully customizable, and also available for license with complete support for qualified organizations. Please contact Courseware@triveratech.com for details

Session: Getting Started with Struts

- Jakarta Struts Project
- MVC and Struts
- Review Servlets, JSP and Web Applications
- Struts Controller, Views and Resources
- Struts Architecture
- What's New in Struts 2.0

Session: Your First Struts Application

- Configuring Struts applications
- Input JSP
- Defining Actions
- Defining Action Forms
- Defining FormBeans
- Action Mappings

Session: Mapping the Model to the View

- Review using Custom Tags
- Introducing Struts Tags
- Defining beans into the model
- Working with headers
- Working with Beans
- Using Logic Tags;
- Using HTML Tags
- Handling message resources
- Working with HTML forms and form beans

- Iterating over lists and sublists
- Conditionally including parts of your JSP
- Using JSTL in place of the Struts Custom Tags

Session: Uploading Files and I18n

- Locales
- PropertyResourceBundles
- Formatting Messages
- Message Resources
- Internationalization

Session: Putting It All Together

- Create the Application
- Forward Action
- Searching
- Prepopulating Forms
- Validating forms
- Showing and Editing Error Messages
- Handling Exceptions
- FormBeans vs. Value Objects
- Add/Edit/Delete Listing

Session: Advanced Forms Management

- Working with DynaActionForms
- Struts Validator : Email, mask, range, length, date and credit card validation
- Creating Validation Rules
- Validation.xml
- Use the Correct Form Bean
- Put it together: Add into the Project

Session: Working with the Tiles Custom Library

- Defining templates
- Using put and insert
- Advanced tile features (optional lesson)

OPTIONAL SESSIONS – By Request Only

NOTE: The following sessions are optional and must be requested additionally. Adding these sessions may extend the course beyond five days. A brief technical call to assess your training goals and challenges can help us adjust the agenda to best suit your needs, and fit in the skills and topics of most importance to your team to meet your objectives.

Session: Advanced Tiles (Optional)

- Advanced Tiles
- Tiles as Visual Components
- Using Tiles to Write Visual Components
- Extending Definitions (Optional)

Session: Developing Custom Tags (Optional)

- Creating & Developing Custom Tags
- Struts Utility Classes
- Custom Tags using Struts Utilities
- Custom Tags Development with JSTL

Session: Extending Struts (Optional)

- Review of Struts Architecture
- Custom Config Objects
- Plugins
- RequestProcessor
- Case Study
- Best Practices

Session: JSP 2.0 (Optional)

- Introduction
- The Expression Language
- EL Functions
- Simple Tag Handlers
- JSTL 1.1; JSTL Core
- JSTL Format; JSTL SQL
- JSTL XML

► Why Work With Trivera Technologies?

- **We provide a solid struts and J2EE development foundation.** Students will learn how to develop (and reuse!) essential Java and Struts design skills and concepts properly, using best design practices, grounding them for advanced curriculum. Students will be prepared for designing and implementing real solutions, right after the class ends. Students will learn the importance of developing well-designed J2EE applications.
 - **Our courses are focused - no "fluff" included.** We offer more than a "laundry list" approach to teaching. All lessons have clear objectives, are fundamental to core J2EE or JavaEE development and design practices, and are reinforced by hands-on labs and solid practical examples. Each lesson has performance driven objectives that ensure students will learn technologies and skills core to fundamental J2EE application design – nothing more, nothing less.
 - **Our materials are comprehensive, and current.** Our comprehensive manuals include not only a hard copy of the course presentation, but also detailed reference notes, pertinent diagrams and charts, current lists of suggested online resources and articles, and often technical tutorials or white papers geared to the topics at hand.
 - **We set you up!** Hands-on courses also include our unique materials for each student, complete with our **LoadNGo Instant Classroom** course set up DVD, software, and a multitude of learning resources that complement the course. Run the course right off the DVD – minimal set up for your company – maximum results for your students.
 - **We foster "Learning by Doing".** Progressive labs are designed in such a way that students get a firm grasp on fundamental skills while they work toward defending a complete application. All labs are take-home, and all solution code is presented in an easy to use self-study format for future use and review.
 - **True content ownership gives us flexibility & quality above the rest.** These course materials are wholly-owned by our company and fully customizable - at little or no cost - to help you best meet your learning objectives. We have many dedicated experts available worldwide to instruct your team, and can provide services around the globe, either locally or virtually. We work closely with you to produce the most effective events and materials for your team, within your desired timeframe and budget.
 - **We have to adhere to higher standards.** As a courseware provider, our content and hands-on lab materials are licensed internationally by dozens of firms, and are therefore subject to very stringent quality requirements. Not only will your organization benefit from our own technical team's technical expertise, but also the feedback of hundreds of students and trainers using these materials, worldwide, on a regular basis. This unique fact guarantees that our materials are not only robust and interesting, but also technically correct, current and of the highest quality and usability.
 - **We bring years of practical, current experience into the classroom and content.** Our instructors and course authors are also skilled mentors, Java, J2EE, .Net, SOA, and web services developers, architects and security-oriented professionals. We believe that learning, using and maintaining solid software execution and delivery methods are as important as gaining sharp coding skills. Best Practices for software development and execution, beyond technical coding skills, are enforced throughout all of our courses and discussions. Our team brings this extensive experience into every classroom and engagement.
 - **We're skills-centric.** Although our team has extensive experience using a variety of tools and solutions, our core content is "technology-centric". Our aim is to teach you the best skills and solutions out there – not to sell you software from any particular vendor.
 - **We're Java & J2EE authors and industry speakers.** Our team was selected to write the online *J2EE, EJB, EJB CMP-CMR and Web Services Tutorial Series for IBM developerWorks®* (www.ibm.com) These are the same instructors who train our classes and author the courseware. Most of our trainers/consultants have also authored additional articles on web services, EJB< Struts, J2EE and advanced Java topics, and are recognized speakers and presenters on the industry technical seminar circuit. Our team is comprised on several successful published authors. Members of our team have written or contributed to: *Eclipse Kick Start, Mastering Eclipse; Professional Jakarta Struts; Using Java Tools for Extreme Programming; Mastering Resin; Mastering TomCat and others.*
- Our services are guaranteed.** Whether you're a stakeholder organizing your firm's educational services, a student in our live or virtual classroom or a trainer using our materials to educate your own client or team – **Our core mission is to make YOU a success in the classroom.**

► For Additional Information

Need dedicated training? All courses can be brought onsite for a **private presentation**, customized to suit your unique requirements or goals. Please contact Training@triveratech.com for course details, Public Schedule dates and locations, and Special Discount Offers.

Need courseware? Let us take the risk out of your classroom delivery! All materials are also available for corporate license with complete instructor support and free corporate branding. **For more information** about our training, mentoring or courseware licensing options, or to see our complete list of course offerings and services, please visit us at www.triveratech.com, email Training@triveratech.com or call 609.953.1515.
