

## QuickStart to Azure OpenAI Basics for Technical Users (TTAI2330)

Hands-on Open AI | Azure Setup, OpenAI Essentials, APIs, GPT-3, Whisper and DALL-E, build a GPT-based Chat Bot & More

### Course Snapshot

- **Course: QuickStart to Azure OpenAI Basics for Technical Users (TTAI2330)**
- **Duration:** 1 day
- **Audience & Skill Level:** This introductory-level course is ideal for technical professionals working in a wide range of industries, such as software development, data science, marketing and advertising, finance, healthcare, and more, who are looking to use the latest AI and machine learning techniques in their work. Basic Python skills recommended.
- **Format / Hands-on:** This course combines engaging instructor-led presentations and practical demonstrations with hands-on programming exercises, challenge labs, use case exploration and engaging group activities. Student machines are required.
- **Flexible Delivery Options:** This course can be delivered for your team or organization **online-live (virtual), onsite in-person, self-paced** or across our immersive **blended learning experience platform (LXP)**.
- **Public Schedule:** This course is currently available on our Public Open Enrollment Schedule.
- **Customizable:** We're flexible! This course agenda, topics, labs, hours and delivery modalities can be adjusted to target your specific training skills objectives, tools and learning goals. Please ask for details.

---

### Overview

Geared for technical professionals, **Quick Start to Azure AI Basics for Technical Users** is a fun, fast paced course designed to quickly get you up to speed with OpenAI's powerful tools and functionality, and to provide hands-on experience in setting up an OpenAI environment on Azure. Guided by our AI expert, you'll explore the capabilities of OpenAI's GPT-3, Whisper and DALL-E, and build a chatbot on Azure. It will provide you with the knowledge and resources to continue your journey in AI and machine learning and have a good understanding of the potential of OpenAI and Azure for your projects.

First, you'll dive into the world of **OpenAI**, learning about its products and the capabilities they offer. You'll also discover how Azure's offerings for AI and machine learning can complement OpenAI's tools and resources, providing you with a powerful combination for your projects. And don't worry if you're new to **Azure**, we'll walk you through the process of setting up an account and creating a resource group.

As you progress through the course, you'll get the chance to work with **OpenAI's GPT-3**, one of the most advanced large language models available today. You'll learn how to use the OpenAI API to access GPT-3 and discover how to use it to generate high-quality text quickly and easily. And that's not all, you'll also learn how to build a GPT-3 based chatbot on Azure, giving you the opportunity to implement advanced natural language processing capabilities in your chatbot projects.

The course will also cover **OpenAI Whisper**, an OpenAI tool that can improve the quality of text generation, allowing you to create more coherent and natural language content. And you will learn about **OpenAI DALL-E**, an OpenAI tool that can generate images, giving you the ability to create unique and engaging visuals to enhance your content and projects.

NOTE: Everyday business users who are less technical might consider the TTAI2001: Azure OpenAI for Business Users as an alternative.

### Learning Objectives

Working in an interactive learning environment, led by our engaging OpenAI expert you'll:

- Understand the capabilities and products offered by OpenAI and how to access them through the OpenAI API.
- set up an OpenAI environment on Azure, including creating an Azure virtual machine and configuring the environment to connect to Azure resources.
- Gain hands-on experience building a GPT-3 based chatbot on Azure and implement advanced natural language processing capabilities.
- Use the OpenAI API to access GPT-3 and generate high-quality text.

- Learn how to use Whisper to improve the quality of text generation.
- Understand the capabilities of DALL-E and use it to generate images for unique and engaging visuals.

### Audience & Pre-Requisites

This introductory-level course is great for experienced technical professionals working in a wide range of industries, such as software development, data science, marketing and advertising, finance, healthcare, and more, who are looking to use the latest AI and machine learning techniques in their day to day. The hands-on labs in this course use Python, so you should have some familiarity with Python scripting basics.

**Take Before:** You should have incoming skills aligned with the topics in the course(s) below, or should attend as a pre-requisite:

- TTPS4872 Python Primer for Data Science & Machine Learning (2 days) or
- TTPS4800: Introduction to Python Programming Basics (3 days)

**Next Steps / Follow-on Courses:** We offer a wide variety of follow-on courses and learning paths for Generative AI, AI for Business, GPT, Applied AI, Azure OpenAI, Google BARD, AI for developers, testers, data analytics, machine learning, deep learning, programming, intelligent automation and many other related topics. Please see our catalog for the current **AI & Machine Learning Courses, Learning Journeys & Skills Roadmaps**, list courses and programs.

---

### Course Topics / Agenda

*Please note that this list of topics is based on our standard course offering, evolved from typical industry uses and trends. We'll work with you to tune this course and level of coverage to target the skills you need most. Topics, agenda and labs are subject to change, and may adjust during live delivery based on audience skill level, interests and participation.*

#### 1. Introduction to OpenAI and Azure

- Explore OpenAI and its products, as well as Azure's offerings for AI and Machine Learning, allowing you to understand the tools and resources available to you for your AI projects.
  - Explore OpenAI and its products
  - Explore Azure and its offerings for AI and Machine Learning
  - Lab: Set up an Azure account and creating a resource group

#### 2. Get Hands-On: Setting up an OpenAI environment on Azure

- Walk through the process of setting up an OpenAI environment on Azure, giving you the hands-on experience needed to start building your own projects using OpenAI and Azure.
  - Create an Azure virtual machine and installing the OpenAI SDK
  - Configure the OpenAI environment and connecting to Azure resources
  - Lab: Set up an OpenAI environment on Azure

#### 3. Explore OpenAI GPT-3

- Learn about GPT-3, one of OpenAI's most powerful language models, and how to use it to generate high-quality text, giving you the ability to create natural

language content quickly and easily.

- Review GPT-3 and its capabilities
- Use the OpenAI API to access GPT-3
- Lab: Use GPT-3 to generate text

#### 4. Get Hands-on: Building a GPT-3 based chatbot on Azure

- Learn how to build a GPT-3 based chatbot on Azure, giving you the opportunity to learn how to implement advanced natural language processing capabilities in your chatbot projects.
  - Setup an Azure Function and creating a chatbot
  - Integrate GPT-3 with the chatbot
  - Lab: Build a GPT-3 based chatbot on Azure

#### 5. OpenAI Whisper

- Explore Whisper, an OpenAI tool that can improve the quality of text generation, allowing you to create more coherent and natural language content.
  - Explore Whisper and its capabilities
  - Use Whisper to improve the quality of text generation
  - Lab: Use Whisper to improve the text generated by GPT-3

#### 6. OpenAI DALL-E

- Explore DALL-E, an OpenAI tool that can generate images, giving you the ability to create unique and engaging visuals to enhance your content and

projects.

- Explore DALL-E and its capabilities
- Use the OpenAI API to access DALL-E
- Lab: Use DALL-E to generate images

#### 7. What's Next: Keep Going!

- Other ways OpenAI can impact your day to day
- Explore great places to check for expanded tools and add-ons for Azure OpenAI
- Where to go for help and support

#### Bonus Chapter

#### 8. Quick Look at Generative AI and its Business Implications

- Understanding Generative AI
- Generative AI in Business
- Ethical considerations of Generative AI
- Demo: Generative AI in Practice: Briefly demonstrate using OpenAI's GPT-3 to generate engaging marketing copy. Analyze the output and show how parameters can be modified to refine the content.

### Setup Made Simple with our Robust Learning Experience Platform (LXP)

All applicable course software, digital courseware files or course notes, labs, data sets and solutions, live coaching support channels and rich extended learning and post training resources are provided for you in our “easy access, no install required” high-speed **Learning Experience Platform (LXP)** remote lab and content environment. Course materials, software, resources and post-training platform access periods vary by course. Please inquire about details for this specific course.

#### For More Information

For more information about our dedicated skills-focused training services (instructor-led, self-paced or blended), collaborative coaching services, robust Learning Experience Platform (LXP) solutions, Career Experiences, public course schedule, partner programs, courseware licensing options or to see our complete list of course offerings, training solutions and special offers please visit us at [www.triveratech.com](http://www.triveratech.com), email [Info@triveratech.com](mailto:Info@triveratech.com) or call us toll free at **844-475-4559**. Our pricing and services are always satisfaction guaranteed.
