

Jump Start to Jira for End Users (TTDV7541)

Quick Start to Using Jira for Creating, Tracking and Reporting on Feature Requests, Reported Bugs & Managing Workflow

Course Snapshot

- **Course: Jump Start to Jira for End Users (TTDV7541)**
- **Duration:** 2 days
- **Audience & Skill-Level:** This is an introductory-level course for users **new to Jira** who want to use Jira as an Agile team member.
- **Format / Hands-on:** This course combines engaging instructor-led presentations and practical demonstrations with hands-on exercises, challenge labs, use case exploration and engaging group activities. Student machines are required.
- Our typical classroom lab environment is a hosted Jira solution using the latest major version available. Other versions and installations can be used upon request.
- **Flexible Delivery Options:** This course can be delivered for your team or organization online-live (virtual), onsite in-person, self-paced or across our immersive blended learning experience platform (LXP).
- **Public Schedule:** This course is currently available on our Public Open Enrollment Schedule.
- **Customizable:** We're flexible! This course agenda, topics, labs, hours and delivery modalities can be adjusted to target your specific training skills objectives, tools and learning goals. Please ask for details.

Overview

Jira from Atlassian is a leading project management software that enhances team collaboration and productivity, offering extensive versatility to manage your team's workflow, keep track of tasks, and streamline communication. **Jump Start to Jira for End Users** is a two-day, workshop style course that gets you quickly up and running with the core skill needed to start using Jira in your role or on your projects to get organized, optimize your tasks and enhance your productivity.

Working in a hands-on learning environment, guided by our Jira expert, you'll engage in hands-on practical tasks, discussions, and group activities that offer firsthand experience in using JIRA for both business and agile projects, understanding task management, users and roles, running projects with Kanban, and resolving issues effectively. You'll gain proficiency in working with issues, issue cloning, and time tracking, customizing built-in and custom fields, and optimizing JIRA screens. You'll also master the crucial facets of workflow and business processes, with lessons on mapping business processes, managing workflows, and adapting them to your projects. The course also equips you with powerful search and reporting skills, enabling you to utilize basic and advanced JIRA Query Language (JQL), generate impactful reports, dashboards, and work efficiently with search results.

You'll leave with hands-on experience and the confidence to apply your new Jira skills to effectively manage your team's workflow, improve communication, and drive your projects towards successful outcomes. With these skills, you'll be ready to transform your project management approach, enhancing productivity and efficiency within your organization.

NOTE: Students responsible for Jira administration should consider **TTDV7540 JumpStart to Jira for Administrators** as an alternative course.

Learning Objectives

Working in a hands-on learning environment, exploring several practical use cases that provide context as to where and when to use Jira, you'll learn to:

- **Grasp the Basics:** Familiarize yourself with the fundamental concepts, terminologies, and infrastructure of JIRA to lay a strong foundation for effective usage.
- **Master Business and Agile Projects:** Gain hands-on experience in using JIRA for business and agile projects, enhancing your skills in task management, process management, and running projects with Kanban.
- **Navigate Issue Management:** Become proficient in dealing with issues, issue cloning, and time tracking to streamline your tasks and subtasks.
- **Customize Field and Screen Management:** Learn to tailor built-in and custom fields, and work with JIRA screens and screen tabs, personalizing your user experience.
- **Map Out Your Workflow:** Understand how to map business processes, manage workflows, and apply them to projects,

transforming complex procedures into manageable steps.

- Sharpen Your Search and Reporting Skills: Utilize JIRA's powerful searching and reporting tools, mastering both basic and advanced search with JIRA Query Language (JQL), and creating insightful reports and dashboards.

Audience &

This introductory-level course is ideal for project managers, team leaders, Scrum Masters, product owners, and members of technical and non-technical teams who are involved in project management or coordination. Individuals who aim to boost their productivity, enhance team communication, and streamline their workflow within their organization would greatly benefit from this course.

Pre-Requisites

While this course is designed for beginners, you should have a basic grasp of project management concepts will be helpful, even if it is from a non-software perspective.
